Hi Melanie,

Thanks for checking in, and the short answer is yes. I was in a rush to get the PN and public hearing announcement out because we have to post the public hearing in a local newspaper at least 10 days before the hearing date, and the hearing has been scheduled for September 29th.

That said, I'm planning to put the red file packet together today and send that off. Looks like Jeff might be out until Monday, so I'll have to correct any missteps I make when he gets back and can call me to task.

I'll have something over to you ASAP.

Thanks,

Luke

Lucas A. Trumble, P.E., Supervisor

Hi Luke,

I received this Public Notice through our NEPA staff. Should I be receiving it as a red file with the buck slip/ESA checklist soon? The timing of the EGLE PN and EA are a little different, but I can start coordinating with the other federal agencies ASAP.

Thanks,

Melanie Burdick

Once the link is open, to view documents click the “Documents” button to view the Public Notice Announcement and the appropriate plans for the project. To leave a comment, please click on the “Add Comment” button. When inputting your comment please do not add any personal identification information (PII) concerning yourself or any other individual, into the comment box, including but not limited to email or telephone number.

The above link will expire 20 days from today’s date.

District Office: Grand Rapids District Office

WRD Contact: Lucas Trumble, TrumbleL@Michigan.gov

County: Kent

Public Notice Start Date: September 15, 2022

Public Notice End Date: October 5, 2022

Site Name: Grand River-Grand Rapids

Application Submission Number: HNV-A018-7X9N3

Applicant: Tim Burkman

Project Location: City of Grand Rapids

TRS: T07N, R12W, S25

Regulatory Authorities Under NREPA: Part 31, Water Resources Protection; Part 301, Inland Lakes and Streams; and Part 303, Wetlands Protection, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA).

The applicant proposes: To remove four existing concrete low-head dams and install four rock grade control structures with wave and riffle features. The proposed activities would include excavation of approximately 13,331 cubic yards of material below the Ordinary High Water Mark (OHWM) and 1,230 cubic yards from within the 100-year floodplain and placement of approximately 19,755 cubic yards of fill below the OHWM and 9,395 cubic yards within the 100-year floodplain of the Grand River, impacting approximately 0.03 acres of wetland.

Regards,

Atarah Washington
